Note for Graveley Parish Council meeting:

Graveley Parish Council contacted Climate and Environment Project Officer, Cathy Linn, to request participation in the Six Free Trees scheme. Following the required process, GPC consulted with their supplier, English Woodlands, and selected six native whips: Hawthorn, Hornbeam, and Field Maple, suitable for our soil type and safe/non-toxic for grazing horses.

The trees arrived during the week commencing 15th December and were kindly planted on Parish Council land by local resident Irena Williams to restore native hedgerow. Irena has agreed to monitor the trees, provide feedback as required, and has shared the attached images of the planting.

Graveley Parish Council wishes to thank District Cllr Peter Sandford for highlighting the scheme, Project Officer Cathy Linn and ZCC for their support with the application process, and Irena Williams for their planting and ongoing monitoring. The Council has also requested future notifications of similar environmentally beneficial schemes via email circulars, in support of SCDC's Clean Air Initiative and the Cambridgeshire Zero Carbon initiative.

Consider Action- perhaps these images could be communicated within Six Villages newsletter and social media with a suitable accompanying post to highlight GPCs efforts in support of environmental conservation and the natural environment.
